EDUCATION

University of Waterloo

Honours Bachelor of Computer Science

Waterloo, ON

Sep 2024 - May 2029

Relevant Coursework: Data Structures & Algorithms, Computer Organization & Design, Object-Oriented Software Development, Logic & Computation, Functional Programming, Discrete Mathematics

Waterloo Deal Group | Director, Product & Technology

TECHNICAL SKILLS

Languages: Python, C/C++, TypeScript/Javascript, Java, SQL

AI & LLMs: Cloud LLMs (Azure OpenAI, OpenAI), Agentic AI, LangChain/LangGraph, Real-time Speech AI

Web & Backend: React, Next.js, FastAPI, Node.js/Express, WebSockets

Cloud & Systems: Azure (AKS, Container Apps, ACR, Front Door), AWS, Kubernetes, Docker, Istio, Temporal, CI/CD

Data & Developer Tools: PostgreSQL, Supabase, Redis, SQLAlchemy, Playwright, GitHub Actions

WORK EXPERIENCE

Project Manager, CSI - Volaris Group

May 2026 - Aug 2026

Mississauga, ON

- Led delivery of **4 enterprise products** from client discovery through production, translating stakeholder needs into technical requirements and release priorities while **reporting directly to the CTO**, with deployments across React/TypeScript, Python/FastAPI, and Azure.
- Led product rollout across **7 portfolio companies**, translating client feedback into **roadmap priorities**, scoring logic, review workflows, and release requirements.
- Owned end-to-end delivery of an **enterprise learning platform** as **PM**, architecting and deploying the production environment on **Azure Container Apps** with automated PITR recovery and zero-downtime deployments.

AI Software Engineer, CSI - Volaris Group

Jan 2026 - May 2026

Mississauga, ON

- Architected an enterprise **Legal Document Analysis platform** on AKS (Istio, Trivy), integrating AI-powered OCR validation, contract risk assessment, multilingual translation, RBAC, and hybrid SSO - **240+ PRs**.
- Engineered a multimodal AI assessment platform using **React/TypeScript, Azure OpenAI Realtime, Temporal, WebSockets, and Supabase/PostgreSQL**; cut voice latency from **10-15s to <3s**.
- Built an **AI portfolio risk engine** across **11 dimensions** with evidence-driven scoring and Temporal durable workflows, powering production assessment and Speech AI pipelines - **580+ PRs**.
- Built an internal **AI Coding Agent** for CSI's **14,000+ developer ecosystem** that generated implementation specs, modified code, ran Playwright tests, validated CI, flagged security/infra gaps, and enforced human approval before merge.

Software Developer, Danier

Jun 2025 - Aug 2025

Toronto, ON

- Engineered an **AI e-commerce assistant** with FastAPI/React over auto-synced Shopify product data, combining product search, FAQ retrieval, caching, and analytics for customer and employee support.
- Built a **low-stock automation pipeline** with SQLAlchemy, Pandas, and OpenPyXL to monitor inventory and trigger HTML stakeholder alerts with **100% alert reliability**; also improved product-data workflows and on-page SEO.

PROJECTS

Valldor - Procurement AI Agent | Next.js, FastAPI, LangChain, PostgreSQL, Three.js

- Selected for a **Y Combinator interview** and received a **conditional offer from Andreessen Horowitz (a16z)** for this autonomous procurement platform.
- Built an **autonomous Procurement AI Agent** handling the **full lifecycle**: ERP monitoring -> vendor discovery -> RFQ -> multi-round AI negotiation -> PO generation -> logistics tracking -> 3-way match -> payment.
- Engineered a **global landed-cost engine** computing duty, freight, and trade-agreement preferences for any delivery point worldwide, with a **4-layer market intelligence system** scoring vendors across **6 axes**.
- Designed a **multi-tenant SaaS** with buyer/seller workflows, onboarding wizard, ERP purchase orders, real-time AI learning from vendor patterns, and a **3D AI avatar** (Three.js + Web Speech API) for voice-driven procurement.

🌀 Muse Sketch Studio 🌀 | [Replicate AI Hackathon Winner] React, TypeScript, Node.js, Replicate API

- Built an end-to-end AI fashion design pipeline (prompt -> sketch -> colorization -> video) with React/TypeScript, Node.js, and Replicate API (google/veo-3) for PNG/MP4 export.

🌀 CarRaksha - Safe Driving System | [All India Techfest Winner] C++, Arduino

- Built a collision-prevention system with Arduino, ultrasonic/MQ-3 sensors, ignition lockout, and speed-limiting, achieving 79% reliability across 10+ vehicle models.

🌀 Semantic Guardian | [DataHub Agent Hackathon] Python, DataHub, Claude

- Built an **AI semantic code-review agent** validating PR diffs against DataHub contracts/lineage, computing **ML blast radius**, and writing durable assertions; **9/9 seeded benchmark**.

🌀 DataHub - Open Source Contribution | GraphQL, Data Contracts, #18746
